Professional Summary

React.js / React Native Developer with 3+ years of experience building scalable and responsive web and mobile applications. Strong expertise in JavaScript, TypeScript, HTML, and CSS, with a focus on performance, maintainable code, and intuitive UI/UX. Experienced in leveraging AI-assisted development tools to accelerate delivery, streamline debugging, and enhance code quality. Comfortable working in lean teams, taking ownership, and continuously learning to deliver high-impact, production-ready solutions.

Skills

- Frontend: HTML5, CSS3, JavaScript (ES6+), React.js/Native, Redux, React Query, Zustand, React Hook Form,
- UI & Styling: Tailwind CSS, Bootstrap, Material UI, Ant Design
- Backend: Node.js, Express.js, Supabase
- API Development: RESTful APIs, API Integration
- Version Control: Git, GitHub
- AI-Assisted Development: Leveraging tools like GitHub Copilot and ChatGPT for rapid prototyping, debugging, and code optimization

Experience

ENFONO Technologies , Kerala

Nov 2025 – Present

Position : React JS Developer

Enterprise ERP Platform:

Tech : React JS, TypeScript, Vite, Module Federation, PNPM, Material UI, React Hook Form, Zod

- Contributing to the development of a large-scale enterprise ERP platform covering multiple business areas, including Shipping, Accounts, and other core business operations.
- Developed and maintained modular frontend applications using a micro-frontend architecture with Vite Module Federation within a PNPM monorepo.
- Built responsive and reusable user interfaces using React 18, TypeScript, and Material UI, following a custom design system.
- Implemented complex forms and data-entry workflows using React Hook Form and Zod, including schema-based and cross-field validation.
- Developed business-rule validations for complex ERP workflows to ensure data consistency and prevent invalid transactions.
- Worked across multiple ERP modules to implement new features, resolve client-reported issues, and improve existing workflows and usability.
- Integrated frontend applications with backend APIs and handled asynchronous data fetching, mutations, validation states, and error handling.

TRANETECH Software Solutions, Calicut Kerala

Jan 2025 – June 2025

Position : React JS Developer

EQUAL ERP Software Solutions:

Website: [View Product](#)

Tech : React.js, Ant Design (antd), Zustand, Laravel

Contributed to the implementation of EQUAL ERP Software Solutions in the UAE, a cloud-based, all-in-one platform designed to manage core business processes efficiently. The project focused on leveraging EQUAL's highly integrated and flexible system to automate workflows and streamline operations across departments.

With its modern user interface and scalable architecture, the solution enabled seamless business activity management within a unified environment, particularly tailored for organizations based in Abu Dhabi

Equal Property Management-

- Implemented a cloud-based ERP solution tailored for real estate management.
- Enabled centralized monitoring of residential and commercial properties.
- Automated tasks such as rent collection, lease tracking, and maintenance management.
- Delivered improved financial oversight and reporting capabilities.
- Supported scalability for small businesses to large enterprises.
- Provided flexible, user-friendly tools for property managers, landlords, and agents.
- Integrated advanced technology to streamline operations and reduce manual workload.

CHAAVIE Solutions, Calicut Kerala

Feb 2023 – Jan 2025

Position : MERN Stack Developer

Happy ERP System:

Tech : React.js, Tailwind CSS, Node JS, Express, Mongo DB

Developed an ERP application encompassing modules for customers, staffs, suppliers, and administration. Successfully optimized business processes, including product creation, purchase orders, goods receipts, customer interactions, cart management, quote generation, staff attendance tracking, and product sales analysis.

Front-end development

- Implemented state management using Redux Toolkit.
- Utilized Context API for efficient data sharing.
- Tanstack Query for data retrieval and caching.
- Implemented user authentication and authorization using JSON Web Tokens (JWT).
- Used React hook form for form handling

Back-end development

- Developed server-side functionality using Node.js and Express.
- Used Mongo Db as DB.
- Ensured secure data transmission with JWT for user authentication

COCO Field Work Management System (Freelance Project)

Tech: React Native (Expo), React, TypeScript, Supabase

- Developed a mobile application for field employees to track work entries, expenses, and collections in real time
- Built a responsive admin dashboard for monitoring operations, payments, and employee performance
- Implemented a secure backend using Supabase with Row Level Security (RLS) for role-based access control
Designed and deployed a Cloudflare Worker proxy to bypass ISP restrictions and ensure reliable API access

Internship

Maitexa Info Solutions Calicut Kerala

Feb 2022 – Dec 2022

MERN Stack Developer

Completed Internship on Full stack web development (MERN). I've gained proficiency in creating responsive and dynamic web applications using HTML, CSS, and React. My learning extends to implementing server-side logic with Node.js and Express for enhanced functionality. Additionally, I've designed full-stack applications, integrating React for the client-side and Node.js with Express for server-side development.

Education

Bachelor Of Computer Applications

SN College Vadakara Kerala – University Of Calicut

July 2015 – May 2018
